Transform

Complete Luxury E-commerce Experience

Prepared for
Luce Divina Corp

PACKAGE SUMMARY

INVESTMENT	TIMELINE	APPROACH	EST. HOURS
\$9,950	4-6 Weeks	Full Build	78-97

What This Package Delivers

Transform is the complete luxury e-commerce experience—built to compete with Diptyque and Jo Malone. Interactive tools, advanced CRM, real-time tracking, and a site that converts browsers into buyers.

✓ Includes Everything in Elevate (\$4,950 value)

Theme Enhancement, CRM Foundation, Content Pages, Performance & SEO — all included, plus the advanced features below.

What's Included

1 Theme Enhancement

- ✓ **Modify existing Dawn theme**
- ✓ **Lifestyle imagery integration throughout site**
- ✓ **Micro-animations & hover transitions**
 - Button hover effects with smooth color/scale transitions
 - Product card lift & shadow on hover
 - Fade-in animations as sections scroll into view
 - Cart icon bounce when item is added
- ✓ **Custom sections (About, Craftsmanship, Brand Story)**
- ✓ **Mobile-optimized luxury experience**
 - Touch-friendly navigation with thumb-zone optimization
 - Swipeable product galleries
 - Sticky add-to-cart button for easy checkout
 - Optimized image sizes for faster mobile load times
- ✓ **Refined typography & spacing system**
- ✓ **Elevated color palette implementation**

2 Shopify-Native CRM Integration

✓ Automated customer tagging system

Customers are automatically labeled based on their behavior—first-time buyer, repeat customer, high-value, etc.—so you can send targeted emails and offers without manual work.

✓ Lifecycle stage tracking (new, active, at-risk)

See where each customer is in their journey. "New" just made first purchase, "Active" bought recently, "At-risk" hasn't purchased in 60+ days. Helps you know who needs a win-back email.

✓ B2B vs D2C contact separation

Wholesale buyers and retail customers have different needs. This separates them so you can send hotels/spas different communications than individual shoppers.

✓ Custom properties (scent preferences, purchase history)

Track what each customer loves—favorite scents, vessel preferences, gift vs personal use. Enables personalized recommendations like "Based on your love of sandalwood..."

✓ Customer notes & interaction logging

Every email, call, or special request is logged in one place. If a customer mentioned they're buying for their mother's birthday, you'll remember next time they shop.

3 Advanced CRM & Segmentation

✓ Customer segmentation (VIP, one-time, dormant)

Automatically group customers: VIPs (top 10% spenders), One-time buyers (need nurturing), Dormant (haven't bought in 90+ days). Each group gets tailored marketing.

✓ Purchase behavior tracking

See patterns: How often do they buy? What's their average order? Do they buy gifts in November? Use this data to predict and prompt their next purchase.

✓ Order status lookup

Customers can check their order status anytime without emailing you. Reduces support tickets and increases trust.

4 Content Pages

✓ Blog page development

✓ About/Story pages

✓ Product page enhancements

- Scent notes breakdown (Top, Heart, Base notes)
- Burn time & room size recommendations
- "Complete the Experience" cross-sell section
- Trust badges (Organic, Non-Toxic, Sustainable)

5 Interactive Tools & Features

✓ Scent Finder Quiz integration

4-6 question quiz that matches customers to their perfect scent. Captures email, increases engagement, and reduces "which should I buy?" hesitation.

✓ Product recommendations by scent preference

✓ Burn Time Calculator

Customers input room size, get recommended candle size and estimated burn hours. Builds confidence in purchase decision.

✓ AR Room Visualizer — see candles in your space via mobile camera

Point phone camera at table, see how the candle looks in their actual room. Reduces "will this fit my space?" uncertainty.

✓ Build-Your-Own Gift Set

Customers select candle + matches + tray to create custom gift. Increases AOV and makes gifting effortless.

✓ Personalization/Engraving Preview

See their custom text on the candle before ordering. Visual confirmation reduces returns and increases personalization orders.

✓ Ingredient Transparency Checker

Click any ingredient to see what it is and why it's used. Builds trust with health-conscious luxury buyers.

6 Notifications & Tracking

✓ **Cart abandonment push notifications**

Browser notifications remind customers about items left in cart—works even when they're not on your site.

✓ **Sales & order notifications**

Real-time alerts when orders come in. Stay connected to your business from anywhere.

✓ **Real-time shipment status w/ map visualization**

Customers see exactly where their package is on a map. Premium experience that reduces "where's my order?" emails.

7 Performance & SEO

✓ **Image optimization for faster load times**

✓ **Core Web Vitals improvements**

- LCP (Largest Contentful Paint) — hero images load in under 2.5 seconds
- FID (First Input Delay) — buttons respond instantly when clicked
- CLS (Cumulative Layout Shift) — no jumping content as page loads
- TTFB (Time to First Byte) — server responds quickly
- INP (Interaction to Next Paint) — smooth scrolling and interactions

✓ **Basic on-page SEO setup**

- Title tags & meta descriptions optimized for each page
- Header hierarchy (H1, H2, H3) properly structured
- Image alt text for accessibility and search visibility

✓ **Meta tags & structured data**

What it is: Code that tells Google exactly what your products are—price, availability, reviews, brand. **Why it matters:** Enables rich snippets in search results (star ratings, prices) which increase click-through rates by up to 30%.

✓ **Mobile performance optimization**

Project Timeline

WEEK 1

Discovery & Design

Theme audit, design direction, imagery selection, CRM strategy planning

WEEK 2

Core Development

Theme modifications, custom sections, animations, content pages

WEEK 3

CRM & Integrations

CRM setup, tagging system, segmentation, email integrations
